DRAFT REPORT

on 'Enhancing energy cooperation within the Eastern Partnership, towards the implementation of 2015 Paris Climate Change Agreement'

Co-Rapporteurs: Andrzej GRZYB (EP) and Tevan POGHOSYAN (Armenia)

Amendment 2	
<i>Motion for resolution</i>	<i><u>Amendment by Jerzy Buzek,</u></i> <i><u>Petras Auštrevičius, Rebecca Harms</u></i>
10. Underlines the key role of gas in transition towards low-carbon intensity of energy systems in Europe; considers in this regards, that diversification of gas sources and routes of supply is key to energy security of EU Member States and Eastern European Partners and their capacity to achieve their commitments on climate change policies; welcomes the opening or development of gas pipeline interconnections, the Southern Gas Corridor and new facilities allowing exports/imports of liquefied natural gas as well as domestic production, including extraction of natural gas from unconventional sources; notes that new routes shall not lead to increased dependency on dominant gas suppliers; stresses that building the North Stream 2 subsea pipeline will negatively impact regional gas market and, in particular, will have a detrimental effect on Ukraine's gas transmission system;	10. Underlines the key role of gas in transition towards low-carbon intensity of energy systems in Europe; considers in this regards, that diversification of gas sources and routes of supply is key to energy security of EU Member States and Eastern European Partners and their capacity to achieve their commitments on climate change policies; welcomes the opening or development of gas pipeline interconnections, the Southern Gas Corridor and new facilities allowing exports/imports of liquefied natural gas as well as domestic production, including extraction of natural gas from unconventional sources; notes that new routes shall not lead to increased dependency on dominant gas suppliers <i>or undermine regional energy security and the EU Energy Union strategy; all new offshore and onshore parts of pipeline infrastructure must respect environmental rules and key principles enshrined in relevant EU legislation;</i> stresses that building the North Stream 2 subsea pipeline will negatively impact regional gas market and, in particular, will have a detrimental effect on Ukraine's gas transmission system;
